But fair trade is simply protection in disguise, and the thing is equally mischievous under either name, meaning as it does that the great body of consumers are in New York harbour. to be taxed for the benefit of a few capitalists interested in particular industries. BEBLIN. I th March. Rumours of a scandal which will soon astonish Berlin have been in circulation for some time. The details are just beginning to leak out, showing a cause celebre with most piquant details. It hangs on a story of gambling in which are mixed some persons of the highest family, both men and women.

A Silesian count went to the cinb around which the scandal centres and dropped 27,000 marks before he found that cheating was practised in a soundalous manner. He promptly notifled the police, who soon discovered that this distinguished ciub was a mere gambling hell where cheating was systematically practised. WESLEY'S THEORY OF EARTH-QUAKES.

"The cause of carthquakes," said John Wesley, How he reasoned it out is not easy for the average sinner to see. The idea of such a treresulting from the violation of moral law is nonsense in the eyes of modern science. The

reverse is more often true. "The cause of a deal of sin," said Hannah More, "is bile." That we can see through. Bile poisonts the brain, and the brain is the organ of the mind. The lady took it, digested a bit of it, and suffered great distress from the presence of the rest in the torpid stomach. We scarcely need earthat her sleep was broken, and mind and body weary, weak, and out of tone. Now what sort of life is this to lead? What is anybody good business if you had to pit yourself against other

Here is certainly a lesson for the day. Probably there is not one person in a thousand who has not suffered from what is called a " bilious attack," and many are more or less bilious all the time. The symptoms are these: Furr t tongue, headache, dulnoss, and sleepiness, yellow eyes and skin, spells of dizziness, bot hands and go'd feet, bad taste in the month, loss of appetite.
